PROFILE

Aspiring Software Developer with a recently completed computer science and engineering Undergraduate degree. Seeking to leverage strong programming skills In Python, SQL, and Front-end Web Technologies to contribute to dynamic development teams and innovative projects. Dedicated to continuous learning and Professional Growth in the field of software development.

PROJECTS/WORKSHOP

PROJECT

To Do List

Dec - 2024

- I will create a website for the to-do list that is useful to everyone.
- A user starts the application.
- For example, Add tasks such as "Complete report by Friday" and "Buy groceries."
- Views the current task list, sorts tasks by due date, and marks "Buy groceries" as completed.
- Saves the task list to a file and exits the application.
- I'm working with front-end, back-end, and database.
- front-end for HTML, CSS, and Javascript.
- back-end for Python programming languages.
- Database for db.sqlite3
